

GOALS

We are working with our suppliers to achieve the following goals by 2025:

Objective	2025 target	Achieved to date
Maximum transportation time of 8 hours for all species	100%	88%
Avoidance of close confinement	100%	89%
Avoidance of all routine and unnecessary mutilations for all species	100%	86%
Use of effective pre-slaughter stunning	100%	91%
Avoidance of products from farm animals subject to genetic engineering or cloning	100%	100%

These goals will be achieved through the improvement in the performance of our existing supply chain where possible and identification of new farms and animal products that comply with our objectives.
